**DGIST PACL**
Privacy and Applied Cryptography Lab.
Prof. Young-Sik Kim

**2nd**
ONE-DAY CLASS

# Side-Channel Analysis One-Day Class

Try 'side-channel analysis' yourself in a single day: recovering secrets from the **power consumption** a device leaks.

#HardwareHacking #Cryptography
#SideChannelAnalysis #AESKeyRecovery

**Mar 5, 2027 (Fri) 12:30 – 17:20** | **Room E3-223**
**First 5 applicants** | **Lunch provided** | **Unlimited snacks**

Dalgu collects power traces and recovers the AES key · you will do this yourself

**When**
March 5, 2027 (Fri), 12:30 – 17:20

**Where**
Room E3-223, DGIST

**Participants**
First 5 applicants
Apply by March 3 (Wed) · confirmed individually in order of application

**Who**
Undergraduates exploring their path, anyone interested in hardware hacking
⚠ Basic Python · C required

**Bring**
Your own laptop

**Perks**
Lunch provided + unlimited snacks

## Schedule

| | |
|---|---|
| 12:30 – 13:00 | Lunch provided |
| 13:00 – 13:20 | Lab introduction |
| 13:20 – 13:50 | Introduction to side-channel analysis |
| 14:00 – 14:50 | Cryptographic algorithm basics |
| 15:00 – 15:50 | Setting up the lab equipment on your laptop |
| 16:00 – 17:20 | **AES key recovery experiment** Main lab |

## How to apply

Applications are open until **Wednesday, March 3**.

Email your name, year, KakaoTalk ID or phone number, and **one line on why you want to join** to the address below.

**dgwogh@dgist.ac.kr**

The first five applicants will be accepted and confirmed individually. Lunch and snacks are provided.
